

AIREZ SITE360™

KNOW WHAT'S HAPPENING WHEN NOBODY'S WATCHING.

Construction sites change every day.
Fixed security doesn't.

SITE SUPERINTENDENT, 2:14 A.M.:

"Was that the wind, or is someone in the laydown yard?"

SITE360™:

"Thermal and vibration confirm after-hours movement at the north gate. Your team has been notified with live location and video."

AIREZ SITE360™ turns a changing jobsite into a continuously understood environment. Cameras, thermal imaging, RFID, BLE/UWB location, vibration, GPS, and environmental sensing feed the AIREZ Physical Intelligence layer, so signals become context—and context becomes the right alert, at the right time, for the right human team.

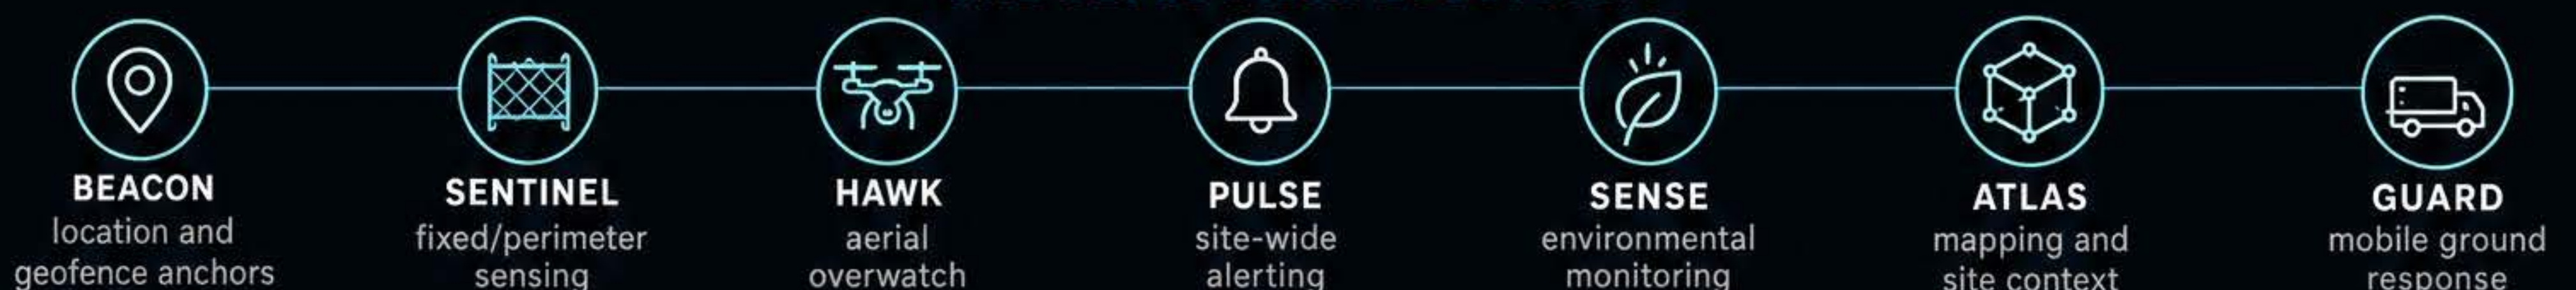

Sense. Locate. Understand. Alert. Deter.

THE JOBSITE CHANGES EVERY DAY. YOUR INTELLIGENCE SHOULD TOO.

SITE360™ deploys as a temporary, relocatable hardware package that moves with the phases of your project—no permanent infrastructure required.

 THEFT & INTRUSION After-hours detection of people, equipment, and copper movement	 WORKER SAFETY PPE awareness and unauthorized-zone monitoring, where configured	 ASSET & MATERIAL TRACKING RFID and BLE/UWB location for equipment and materials
 FIRE & ENVIRONMENT Thermal, smoke, flood, and standing-water awareness	 WEATHER & CRANE CONDITIONS Wind and environmental monitoring for lift safety	 SITE ACTIVITY Equipment and material movement visibility across the jobsite

ONE DEPLOYABLE ECOSYSTEM

SITE360™ maintains awareness and escalates to people. Response decisions stay with your team.

Physical Intelligence by AIREZ.
