

AIREZ SENSE™

Sensor-Enabled Network for Safety & Environment

Know What's in the Air. Act on What Matters.

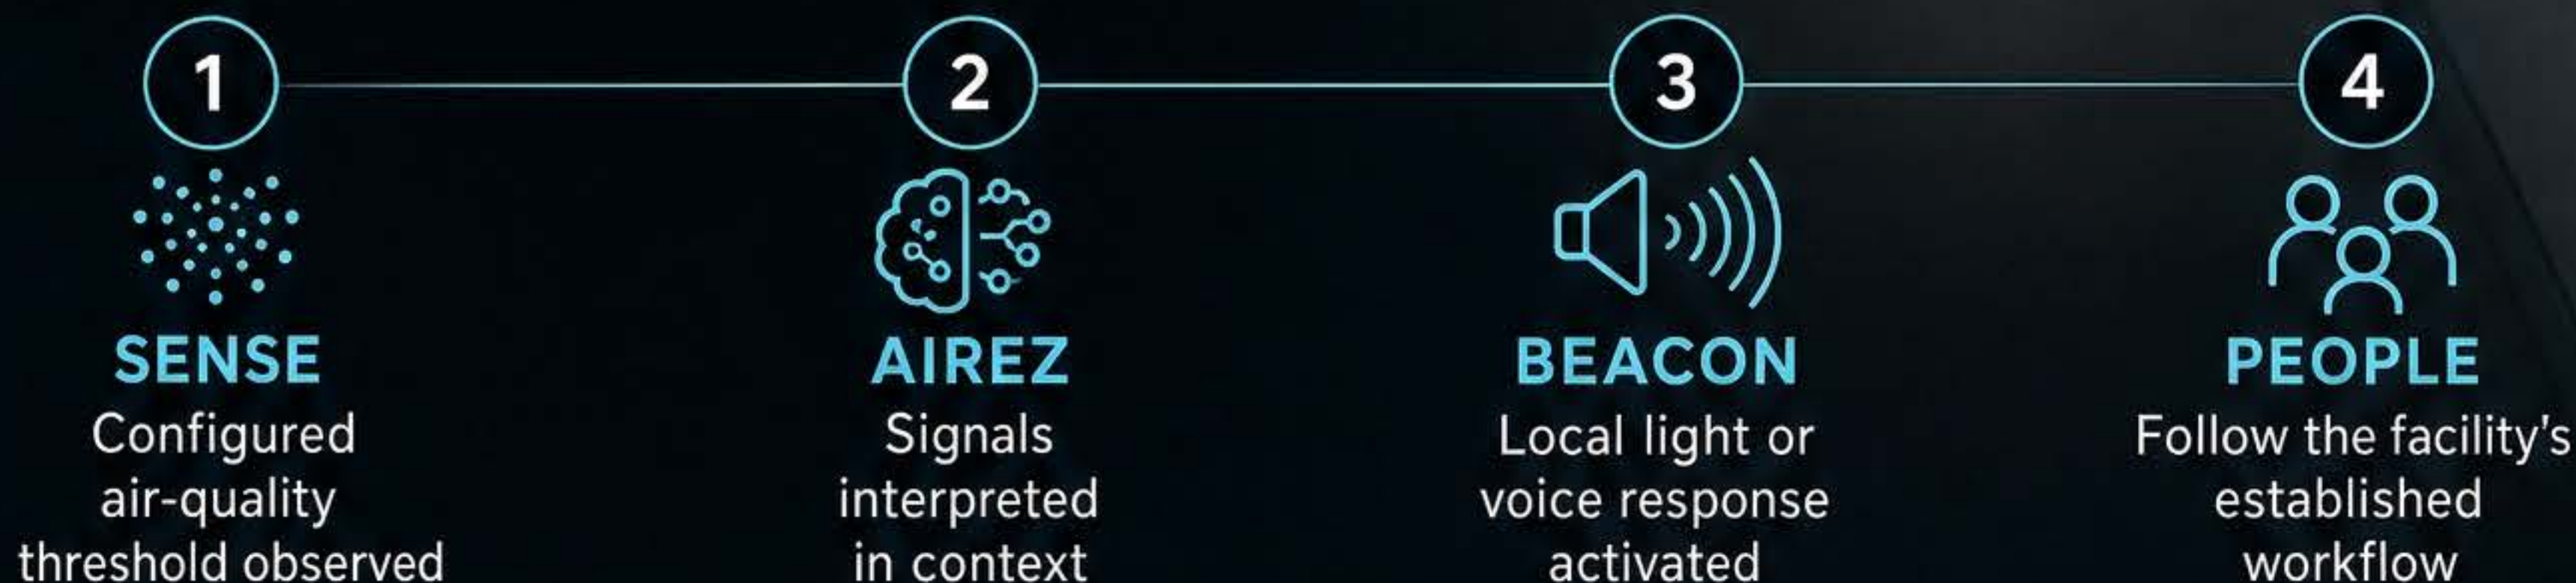

AIREZ SENSE transforms indoor air-quality signals into Physical Intelligence—helping facilities understand changing environmental conditions and activate the right configured response.

SENSE IT. UNDERSTAND IT. RESPOND TO IT.

PM2.5 • CO₂ • VOC • NO_x • Temperature • Humidity • AQI

SENSE + BEACON

The building senses. AIREZ understands. BEACON communicates.

VAPING / SMOKING CONDITION

SENSE detects → AIREZ evaluates → BEACON turns amber

"Smoking and vaping are prohibited in this area."

AIR-QUALITY THRESHOLD

SENSE detects → AIREZ evaluates → BEACON turns red

"Environmental conditions require review. Follow facility safety procedures before entering."

Add intelligence without adding infrastructure.

Portcast connects to selected AXIS IP devices without another IP address, switch port or separate power connection.

Indoor air-quality sensing by Axis Communications.
Physical Intelligence by AIREZ.
